# The Age of RevOps: Reinventing Lead Lifecycle Management

**Chris Ferraro**

Product Marketing, Tray.io

# Agenda

- 01 2022 is all about RevOps
- 02 Why Lead Lifecycle Management?
- 03 Challenges with Lead Lifecycle today
- 04 A new approach to Lead Lifecycle through Low Code Automation
- 05 Customer Examples
- 06 Q&A

# 2022 is all about Revenue Ops

After investing in RevOps, B2B companies report:

**100-200%**

increase in digital  
marketing ROI

**10-20%**

increase in sales  
productivity

**10%**

increase in lead  
acceptance

**15-20%**

increase in  
internal customer  
satisfaction

**30%**

reduction in GTM  
expenses

REVENUE  
OPERATIONS?**

# Why Lead Lifecycle?

Modern B2B buyers' expectations for vendor interactions are increasing rapidly.

B2B buyers expect a truly frictionless, B2C-like, buying experience in every SaaS evaluation.

## Must-haves:

1. **Timely** communication throughout the sales cycle
2. **Personalized** campaigns

**42 hrs**

average sales  
response time for  
B2B companies

**78%**

of prospects buy  
from the company  
that responds to  
their inquiry first

**20%**

sales increase from  
personalized  
campaigns

# A new approach to Lead Lifecycle through Low Code Automation

*A cloud-first approach to automation*

**Recapture lost revenue by exceeding buyer expectations at every touchpoint**

Seamless API integration  
into your best of breed tech  
stack today  
(and tomorrow)

Flexibility to handle  
complex business  
requirements and large  
spikes in volume

Greater transparency into  
bottlenecks

# A new approach to Lead Lifecycle through Low Code Automation

## Lead Lifecycle: Jobs to be done

Capture

from any source

Cleanse

before create

Record

in source of truth

Engage

at the right time, with  
the best message

# Easily Capture

Leads come from a variety of sources which often change as marketers find new channels and platforms that fit their strategy – so you need instant flexibility and speed in how you ingest them.

## Why Low Code Automation?

1. Ingest leads from any source
2. Rapidly stand up new sources
3. Quickly spot ingestion failures
4. Simplify self-service list uploads

# Preemptively Cleanse

The best way to prevent data quality issues is to do so **before** they're written to a source of truth and synced across your systems. Whether it's removing invalid emails, weeding out non-marketable prospects, or cleaning up bad data values – low code makes it easy to cut these issues off preemptively.

## Why Low Code Automation?

1. Centralized email validation
2. Normalize data to acceptable values
3. Filter out unmarketable leads

NEVERBOUNCE

 RISK API

**NORMALATOR** 

# Consistently Record

Assessing lead performance and enacting change requires the consistent capture of clean data in your source of truth system.

This is best accomplished with a service-oriented architecture where centralized processes that capture key data have a specific function (e.g., lead creation, campaign attribution) and are highly reusable.

## Why Low Code Automation?

1. Quickly integrate other systems into your business processes
2. Greater confidence in where leads sit in the funnel
3. Troubleshoot issues more easily by having fewer places to look
4. Rapidly deploy changes to business rules

### Key processes

- CRM record creation
- Account matching
- Attribution
- Enrichment
- Scoring
- Status changes
- Data syncing

# Orchestrate Engagement

Prospects today expect prompt and personalized follow up. Delays or ill-informed communications here put friction in the buying journey that hurt your team's chances at generating qualified leads.

A high performance revenue funnel means engaging based upon where they are in the journey and easily spotting bottlenecks in your process.

## Why Low Code Automation?

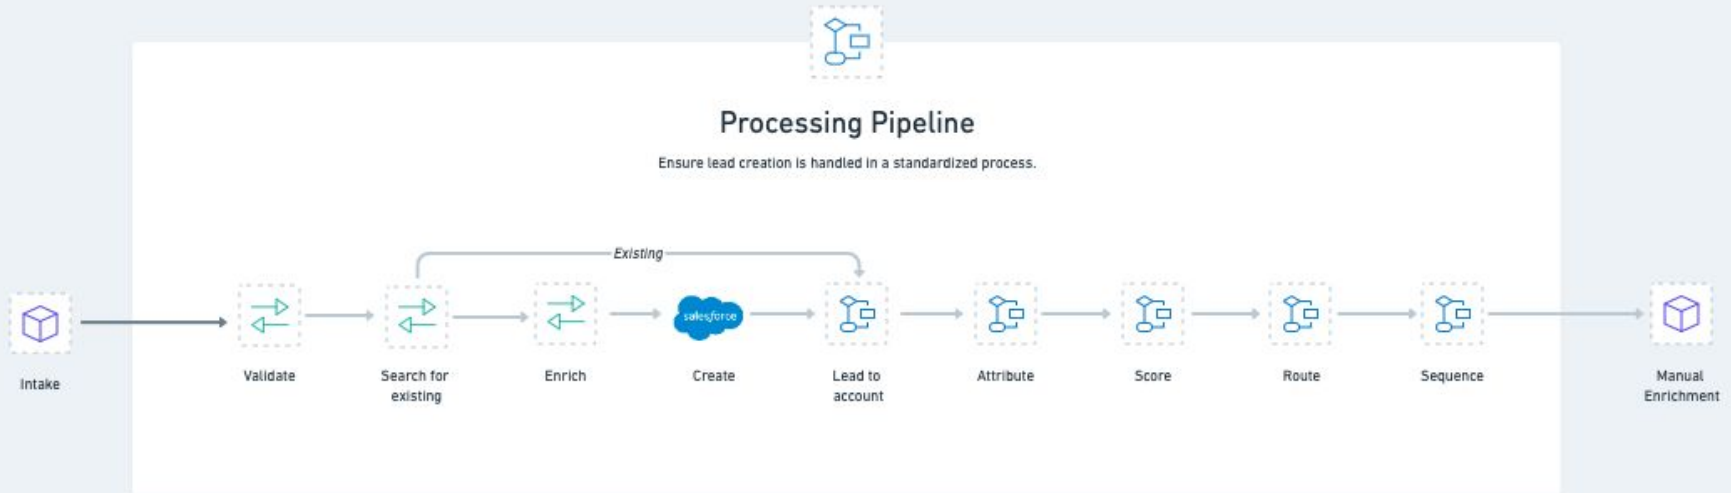

1. Faster, more reliable routing to sales and follow up with prospects
2. Greater control over sales outreach process
3. Listen for and aggregate intent signals from multiple sources

### Key processes

- Routing
- Sales engagement/outreach
- Intent-based orchestration
- Qualification

# Let's take a look at the Lead Lifecycle today...

# Accelerating R&D to building the most powerful low-code platform
